Greater Lawrence Family Health Center

www.glfhc.org

Greater Lawrence Family Health Center has provided comprehensive primary health care services to underserved residents of the Merrimack Valley since 1980.

Growing from one small clinic facility located in the heart of Lawrence, Massachusetts, GLFHC now has eight clinical locations providing care to more than 62,000 patients a year, having continued to grow and expand to meet the needs of the underserved in the region. Our mission is to improve and maintain the health of individuals and families in the Merrimack Valley by providing a network of high quality, comprehensive health care services and by training health care professionals to respond to the needs of a culturally diverse population.

GLFHC uses a comprehensive care service delivery model tailored to meet the needs of the target population—economically disadvantaged, minorities, and working poor. Specific services provided include: primary health care, disease prevention and education, behavioral health, case management, outreach, pharmacy services, nutrition education, HIV/AIDS outreach, education and services, and substance abuse counseling, treatment, and referral. All perinatal, pediatric, and adult primary care services are linguistically and culturally sensitive to patients' needs.

If GLFHC is awarded \$1,500, the money will be used to help renovate and expand our largest clinic in Lawrence, which accounts for 33% of our annual patient visits. The capital project is needed so we can expand medical and behavioral health services for our patients.
